

BENEFITS

BUILD A COMMUNITY

Build a dynamic and relevant community of suppliers that supports your specific program drivers such as innovation and diversity, and access insight into areas of improvement

INCREASE QUALITY

Improve data over time through innovative community-based validation, bettering the quality and accuracy of reporting while reducing cost and effort

GROW VISIBILITY

Increase visibility of similar IMPACT suppliers by putting them in the hands of decision makers along with existing suppliers the moment a need is identified

DISCOVER

Instantly find and deliver new suppliers that meet the requirements of your IMPACT program to grow your efforts and outcomes

SOFTWARE CAPABILITIES

- Search for suppliers and filter for those with specific diversity statuses—choose from 17 different certifications
- Build and save lists of qualified diverse suppliers for specific requirements, and share with your team and stakeholders
- Further filter qualified diverse suppliers by existing, preferred, geography, internal categories and spend
- View a detailed breakdown of your company's diversity spend by industry
- Instantly access industry peers' validation of diversity suppliers you are considering

About tealbook

tealbook is a machine learning platform that transforms a list of suppliers into a community to provide a real-time and dynamic view of the entire supplier base. tealbook allows employees to collaborate while improving and preserving supplier information. Enhanced supplier relationships drive faster and smarter supplier decisions and better business outcomes. tealbook is used to ENRICH knowledge and visibility of existing and preferred suppliers, EXPLORE to identify relevant suppliers for all new business requirements and grow the IMPACT of innovation and diversity programs.
